

# Technical Data Sheet

## POOL DROPS 1.0 L LIQUID ALGICIDE PLUS

### LIQUID ALGICIDE PLUS

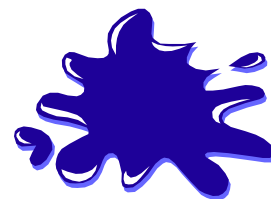

### PRODUCT INFORMATION

**Pool Drops Liquid Algicide Plus** is an extra strength, long term algicide that is ideal for concrete & marblesheen pools where the pH is more variable. **Pool Drops** are also suitable for commercial applications in the summer and winter. They are an excellent Blackspot killer and long life algicidal treatment. The combination of both copper ions and chlorine is always better than just chlorine alone.

- Eliminates all Blackspot, Mustard and Green Algae in swimming pools from walls, grouting and steps.
- Long term soluble liquid allowing more flexible dosing.
- Saves money by reducing chlorine consumption and salt water chlorinator running times.
- A long life algicide that stays dissolved for months to protect pool surfaces, making pool care simple.
- Winteriser for the non swimming months to kill algae without any chlorine present.
- Strongly chelated copper algicide that out performs other algicidal products.
- Pool water will not suddenly turn green when chlorine levels fall.
- Resistant to pool chemicals and fluctuating pH levels.

### SUITABLE FOR

- Extremely oxidation resistant.
- Heated, fresh or salt water chlorinated pools.
- Ozone and UV systems.
- Vinyl liner, fibreglass pools and especially concrete, marblesheen & pebblecrete pools.

### ACTIVE CONSTITUENTS

- Strongly complexed ionic copper at 64g/kg present as copper sulphate.
- Contains no chlorine or caustic agents.

### GOVERNMENT APPROVALS

- Australian Pesticides and Veterinary Medicines Authority for use in all Australian States and Territories. APVMA Approval 46425/1998.

### DOSAGE

- 500mls x Pool Drops for 3 months, if Algae persists repeat after 1 month with no further treatment for 3 months thereafter (50,000 litre pool).
- The Dose rate is less than 1mg/L which is below the world and Australian standard for drinking water.

### PACKAGING

- 1.0 litre bottle.
- 10 bottles per carton.
